

# eLearning Subscriptions

Scalable and Flexible Educational Plans Designed to Maximize Your Software Investment with a Better-Trained Staff

CentralSquare offers scalable education subscription offerings to ensure you can effectively and efficiently maximize the value of your software investment.

These plans save you time onboarding new personnel, provide on-going training and support for your teams, and equip every role on your team to maximize the features and functionality of your software. The on-demand, self-paced courses are available 24/7, offering the flexibility to access them whenever learning is most convenient for your staff.

Select from two educational subscription plans:

- Individual eLearning Subscription Plan
- Organization eLearning Subscription Plan

## WHAT IS INCLUDED IN THE PLANS?

Both plans provide authorized users unlimited access to all the courses and assessments in CentralSquare University for the duration of the subscription period. CentralSquare University features over 300 product courses as well as over 250 workforce development training courses on a variety of topics ranging from HR compliance to workplace safety. New courses are added every week!

Because courses are provided in a self-paced format, all learners receive a consistent learning experience and can access training courses at a time convenient for them.

The affordable pricing structure is intended to ease the budget barriers for keeping your staff properly trained on your CentralSquare products and general employee training needs. Depending on the plan you purchase and the number of authorized users, a learner can receive the training he or she needs for less than a dollar day.

## WHAT IS THE DIFFERENCE BETWEEN THE TWO PLANS?

With the individual eLearning plan, subscriptions are sold individually providing a cost effective and convenient solution for onboarding new employees or for addressing ongoing training needs for a limited number of employees.

The organizational plan provides up to 500 learners access to the CentralSquare University courses and is a more cost-effective solution for 40 or more learners. For organizational subscribers, we also provide you with a private account that is branded exclusively for your organization and the ability to transfer subscriptions without restriction and to create individualized paths of instruction. This makes it an ideal solution for organizations who desire the capabilities of a learning management system at an attractive price point and one which comes preloaded with CentralSquare product training that is unavailable anywhere else! The table below summarizes the key differences.

Customer Need	Individual	Organizational
Onboarding new CentralSquare software users	✓	✓
Refresher training for CentralSquare software users	✓	✓
Workforce skills training for new and existing employees	✓	✓
Training (product or work skills) is required for 40+ employees		✓
Ability to transfer subscriptions		✓
Desire a private, branded environment		✓
Ability to create, monitor and deliver all training from one location		✓
Ability to create individualized paths of instruction		✓

## CAN I SEE A CATALOG OF LEARNING CONTENT IN THE UNIVERSITY?

You can view a catalog of on-demand content currently published in the CentralSquare University by going to <https://catalog.centersquare.com>. This link allows you to see a page that provides access to various catalogs segmented by product line and category (e.g. workforce skills, business analytics). You can access these resources at any time to see what on-demand learning events are available in the university.

## WHO DO I CONTACT FOR MORE INFORMATION?
